JESSICA is a pioneer in the professional nail care industry as she was the first to recognize that like skin and hair, all nails are not alike as well, identifying the four different nail types – damaged, dry, brittle or normal – and creating specific treatments for each type. GELeration by Jessica

In demand to everyone's busy lifestyle and their desire to maintain healthy nails, Jessica (The Natural Nail Company) have launched a new product designed to give you all the benefits of gel overlays whilst still enabling the nail to grow strong and healthy underneath.

Professional GELeration™ Soak-Off Gel Polish

What is GELeration?

GELeration is a new **soak-off gel polish** which enables weak, bitten or problem nails the chance to grow.

Jessica was one of the first companies to make products free of formaldehyde, toluene and DBP and this is still true of the GELeration range. The combination of resin and polymer gives the durability and strength of a gel with the high gloss and thinness of a polish.

Why GELeration?

GELeration can be applied over the top of a Jessica Treatment Base Coat for those nails in need of a little extra T.L.C, all the while being given the 'coat of armour' protection of the gel polish, enabling nails that wouldn't otherwise grow, the chance to do so.

There is no harsh, nail damaging buffing for removal; GELeration is easily soaked off in just 10 minutes and a fresh colour can be reapplied straight away.

You will have manicured nails that are instantly dry, chip resistant and retain that 'just done' high gloss finish without the need for re-glossing with a top coat.

This soak-off gel polish is currently available in 25 gorgeous Jessica shades.

So, if you want strong, beautiful, high gloss nails but don't always have the time to maintain them this is definitely the treatment for you.
